

Hygiene Services

Welcome to Hampshire Pest Control 247: HPC247 Hygiene Services

HPC247 provides expert washroom services across Hampshire. With our highly experienced team and customer service excellence you can be assured that our hard work, care and quality of service provision is reflected through our long-term partnerships with our clients.

We provide discreet services to enable our clients to hygienically and conveniently dispose of their sanitary waste. Our comprehensive waste disposal includes services for feminine and male waste, nappy waste collection and sharps bins, HPC247 really do have it all covered.

In addition to our waste collection we will provide and replenish affordable air care to keep your washroom smelling sweet.

How We Work

HPC247's approach is to establish a partnership to meet our customer's objectives. Our aim is a long-term relationship based on reliability, best practice and transparency. Our Account Management procedures involve a single point of contact for clients, regular training, effective support systems and ongoing reporting and dialogue.

What makes our services unique?

A series of factors make us unique in the marketplace and enable us to bring best practice and value to each customer.

Customers benefit from:

- Efficient and reliable services
- Long term relationships
- Expert advice
- One account manager
- One helpline
- One invoice

We offer:

Friendly, helpful, open and honest approach from the contract through to the service, from every member of our team.

We will always listen and will do everything possible to meet and exceed your expectations.

Reliable, discreet service from your service driver giving you peace of mind and trust that we won't let you down

We will always react quickly to any problems.

"The service so far has been reliable, friendly and cost-effective we would happily recommend HPC247."

"We have been delighted with the service received from HPC247, an extremely efficient and reliable company, who we would be pleased to recommend."

Our Services

At HPC247 we are passionate about the customer to our core. This passion for service and customer care has been at the heart of our success. Our family owned business is one of the largest independent washroom services provider in the South. Our dedicated team of service drivers and engineers look after many customers, across Hampshire.

Our Washroom Services

Washrooms are an important part of the facilities that you offer your customers, staff and guests. HPC247 provides the services that play a crucial role in creating a good impression of your washroom environment. At HPC247 we provide regular bin exchange and collections.

Sanitary Waste Disposal

Our feminine hygiene units are well designed, slim line and fit into small spaces. We provide a reliable and discreet service, tailored to meet your individual requirements.

All our staff operating in your washroom are fully trained and have been DBS checked. Waste is disposed of in.

Male Hygiene

Urinary incontinence is a sensitive and under reported issue. We provide bins for male cubicles so that hygiene waste can be discreetly disposed of in a sanitary way.

These facilities ensure that those experiencing bladder weakness are accommodated for.

Air Fresheners

Commercial air fresheners play a crucial part in creating a good impression to your washroom environment and the smells associated with this type of space.

Personal Care Facilities

Changing facilities for carers and parents need to be regularly maintained to ensure clean and safe spaces for personal care. We provide regular bin exchange and collections. Again, all our staff are fully trained and have been DBS checked. Offensive Waste is defined in the Controlled Waste Regulations 2012 as being waste which is unpleasant and may cause offence to the senses. Offensive waste is non-infectious, but only a few specific waste types are suitable to be placed into an offensive waste sack without strict and carefully documented procedures being put in place beforehand.

Sharps Bins

Sharps must be disposed of safely and adhere to current Hazardous Waste Regulations. We offer regular or one-off services for all types of businesses. You're legally obliged to control the waste to avoid health risks in the disposal process. We will collect and incinerate your sharps waste in accordance with legislation without interrupting the day-to-day running of your business.

Waste Bins

Whether you operate a small or large organisation, we provide regular waste bin exchange and collections to suit your business needs. To discuss a tailored plan for your company or organisation, please get in touch with one of our friendly team members today.

Hand Care

Soap dispensers offer a hygienic and economical method of hand washing, essential for stopping the spread of harmful bacteria. Using a wall mounted soap dispenser will save space and allow easy access around hand washing areas, perfect for any commercial washroom.

Pest Prevention and Control

We also offer services to clear unwanted pests and put preventative measures in place before they become a problem. Our teams use advanced equipment and high quality products. What's more, all products have been thoroughly tested and are safe for both a home and working environment.
